
Billy Martínez

SAP Technical Consultant | Solutions Engineering | Full-Stack Delivery

Temuco, Chile | Remote contractor | Full US-hours overlap | billymartinezc@gmail.com | billyflin.dev | linkedin.com/in/billyflin | github.com/Billyflin

Client-facing engineer with 2+ years of professional product delivery. I translate business requirements into solution architecture and working software, then stay involved through implementation, integration, deployment, and troubleshooting. Current scope spans SAP BTP and cloud-native product systems.

EXPERIENCE

BeCloud Consulting | SAP Consultant

Jan 2025 - Present

- Run discovery with clients, clarify requirements, and translate operational needs into solution designs and implementation work.
- Design and build full-stack SAP solutions across BTP, Fiori, CAP/CDS, Work Zone, HANA, Joule, integrations, and distributed deployments.
- Stay responsible across interface, domain model, platform configuration, delivery, and environment troubleshooting.
- For a confidential product, evaluated cloud economics and technical fit, recommended an AWS-to-Google-Cloud re-platform, and aligned stakeholders around the change; implementation is in progress.

Happ Rent | Full-Stack Developer

Oct 2023 - Sep 2024

- Delivered product work across frontend and backend in a rental-technology environment.

SELECTED EVIDENCE

Clinipets | Independent product and private repository

- Designed a B2B2C veterinary platform with clinic isolation, role-based access, conflict-safe scheduling, and versioned clinical records with signatures and auditable addenda.
- Implemented signed idempotent payment flows, secure attachment quarantine, outbox notifications, web/mobile clients, and Docker-based infrastructure using Kotlin/Spring, KMP, Next.js, PostgreSQL, and R2.

UFRO Sustentable | Open university team project

- Built Kotlin/Firebase Android flows for maps, QR scanning, and rewards; the repository documents 83 JVM tests, 89.23% line coverage, and 77.88% branch coverage.

CAPABILITIES

Discovery and requirements translation; solution design; stakeholder alignment; SAP BTP, Fiori, CAP/CDS, Work Zone, HANA, Joule; Kotlin/Spring; TypeScript/React; Node.js; PostgreSQL; REST/OpenAPI; Google Cloud; AWS; Docker; CI/CD.

EDUCATION, CREDENTIALS AND LANGUAGES

Ingenieria Informatica, Universidad de La Frontera | 2020 - 2026 | Final semester, three courses remaining; coursework completion expected in 2026.

AWS Cloud Technology Consultant; AWS Cloud Solutions Architect; AWS Academy Machine Learning Foundations; Google Advanced Data Analytics.

Spanish: Native | English: B2 professional working proficiency | Remote contractor | Full US-hours overlap
