
Billy Martínez

Software Development Engineer in Test | TypeScript, APIs, CI/CD

Temuco, Chile | Remote contractor | Full US-hours overlap | hello@billyflin.dev | billyflin.dev | linkedin.com/in/billyflin | github.com/Billyflin

Quality-focused software engineer with 2+ years of professional product delivery. I turn requirements and production risks into automated checks, testable system boundaries, QA workflows, and release evidence across SAP BTP, web, API, and cloud-native systems.

EXPERIENCE

BeCloud Consulting | SAP Consultant

Jan 2025 - Present

- Introduced automated testing and a dedicated QA stage in a workflow that previously relied on direct dev/production fixes.
- Refine requirements with a functional consultant, implement SAP BTP solutions, and coordinate validation with QA and design before delivery.
- Work across Fiori/UI5, CAP/CDS services, HANA, Work Zone, integrations, deployment, and environment troubleshooting, keeping quality connected to implementation.
- Improve process flows and UX within UI5 standards, identifying failure paths and acceptance risks across interface, service, data, and platform layers.

Happ Rent | Full-Stack Developer

Oct 2023 - Sep 2024

- Delivered product work across frontend and backend in a rental-technology environment.

QUALITY EVIDENCE

UFRO Sustentable | Automated quality evidence

- Built Kotlin/Firebase Android flows for maps, QR scanning, and rewards in a team project using BDD/Cucumber.
- The public repository documents 83 JVM tests with 89.23% line coverage and 77.88% branch coverage.

Clinipets | Reliability-oriented product architecture

- Designed clinic-scoped tenancy, role-based access, conflict-safe scheduling, versioned clinical records, and auditable corrections.
- Defined signed idempotent payment flows, secure attachment quarantine, reliable outbox notifications, OpenAPI contracts, and Docker-based delivery across web and mobile clients.

TEST AND ENGINEERING CAPABILITIES

Test automation; unit and integration testing; API and contract testing; QA workflow design; defect analysis; TypeScript/JavaScript; React; Kotlin; REST/OpenAPI; SAP BTP; CAP/CDS; AWS; Docker; Git; CI/CD; PostgreSQL; authentication and authorization.

EDUCATION, CREDENTIALS AND LANGUAGES

Ingeniería Informática, Universidad de La Frontera | 2020 - 2026 | Final semester, three courses remaining; coursework completion expected in 2026.

AWS Cloud Solutions Architect; AWS Cloud Technology Consultant; AWS Academy Machine Learning Foundations; Google Advanced Data Analytics.

Spanish: Native | English: B2 professional working proficiency | Remote contractor | Full US-hours overlap
